

The Kolb Learning Style Inventory®

The Kolb Learning Style Inventory® is a statistically reliable instrument developed by David Kolb Ph.D. and based on the Experiential Learning Theory. It identifies four distinct learning styles (or preferences) Diverging – Assimilating – Converging - Accommodating which are based on a four-stage learning cycle of:

The Kolb Learning Style Inventory® explores the opportunities and challenges individuals with different learning styles have in:

- Problem-solving
- Working in teams
- Communicating at work

The Kolb Learning Style Inventory® is especially useful when administered at the beginning of a series of learning events such as 'high-potential' or train-the-trainer programs.

Please contact **Dan Norenberg** for more information about The Kolb Learning Style Inventory®.
